PROFESSIONAL SUMMARY

Experienced Web UI Developer and Technical Lead at Globant with over 4 years of expertise in delivering complex frontend solutions for high-profile clients like Disney. Adept at leading technical teams, managing development roadmaps, and spearheading AI integration initiatives. Proficient in Angular, React, and full-stack architectures.

TECHNICAL SKILLS

Angular - React - AI Assisted Development - Leadership - RxJS - Node.js - Typescript - C# .NET

WORK EXPERIENCE

Web UI Developer & Technical Lead | Globant (Disney) Nov 2025 - Present

- Team Leadership: Oversee team operations, prioritize development backlog, and manage ticket assignments to ensure project milestones.
- Stakeholder Liaison: Primary technical contact for clients regarding release planning, scope definition, and delivery timelines.
- AI Initiative Lead: Spearhead the integration, configuration, and governance of AI-driven tools within development workflows.
- Mentorship: Act as Subject Matter Expert, coaching team members on AI-accelerated development and technical problem solving.
- Full-Stack Architectural Support: Provide technical guidance across diverse stacks to assist with cross-functional challenges.
- Roadmap Planning: Collaborate with stakeholders to define and architect scalable, future-proof solutions.

Web UI Developer | Globant (Disney) Jan 2023 - Nov 2025

- Developed and maintained interconnected web applications with complex workflows, ensuring alignment with user experience standards.
- Implemented and maintained a suite of reusable components within an internal library to drive consistency and development velocity.
- Integrated diverse backend resources and APIs for seamless enterprise data flow.
- Validated functional requirements and demonstrated progress through consistent stakeholder reporting.

Freelance Developer Feb 2022 - Present

- Full-Stack Development: Perform both front-end and back-end development tasks to create dynamic, user-friendly web applications.
- Responsive and Accessible Design: Ensure every component of the web application is responsive and accessible across various devices and platforms.
- Design and Architect Web Pages: Apply thoughtful design and architecture principles to ensure scalability, performance, and maintainability of web pages.
